

this is how the film of my life will go

wake up. make love. embrace. stare up at the ceiling, stare up and out the window at the sky. kiss.

take a piss and a shit. wash my face, brush my teeth. sit in front of the computer, stare at screens, imbibe media and discourse, catch up on the currents of civilization and culture. get up, pour a glass of water, go

back to the chair, read, repeat. Breakfast, more media, start work, tend to your plans and schemes.

out after a short bit, out the door, down to the sidewalk out to the street look around and plan how to better our place.

An ideal future through pragmatic practice in the present. To develop real estate is to build civilization and culture. Go outside, take a walk, bring a camera and sketchbook, continually improve this place.

So expensive to build this fucking torture tube to the sea? why give our ground to go-carts?

FUCK SUB - DONT PUT ME DOWN

LETS PUT THE CARS BELOW IF THEY WANT TO DRIVE

GO A LOT FASTER IN AN UNDERGROUND NETWORK OF TUNNELS

KEEP LAND FOR NATURAL BEINGS - DONT GIVE AWAY PARADISE TO MACHINES WE MAKE

FLOWS OF PERSONS ACCROSS OUR COMMON LAND - ALLEYS ROADS FREEWAYS RAILWAYS RIVERS FOR ALL!

ANY ONE! \_\_\_\_\_ EVERY ONE!

THE FIX IS US!

OUR MOST IMPORTANT PRODUCT IS PEOPLE

CITY'S MOST VALUABLE PURPOSE IS TO CONNECT US FACE TO FACE

THE FIX IS ROADS OF CONTINOUS FLOWS OF HUMANS AT MULTIPLE SPEEDS.

THE MECHANISM MOVES SLOWLY ALONG THE SIDEWALK. WALK TO THE CENTER TO GO FASTER.

broadcast power

a single event is able to be transmitted infinitely - only limited by the quantity of receivers.

broadcast power - a single candle would power the globe.

the sun is already broadcasting power \_\_\_\_\_ big candle that we must tap

WITRICITY FIX - no plugs no wires turns on when power is required beyond induction - SEE WITRICITY\

Lets invent the Ideal world

we need a consensus

WE MAKE IT SO

What we want \_\_\_ will be \_\_\_ so long as it IS what we want.

fervor for future perfect fix.

The Fix is nothing but the best objects and systems of man. hardly a need for objects at all save those that serve the most. only things that optimize our lives \_\_\_\_\_ and we will know. my custom made pants and expensive ergonomic chair are falling apart

we have a stagnate city \_\_\_\_\_ greatest land on earth full of all the best people.

the brilliant and the beautiful bound by desire to make this the best environment for humans ever.

cheap fix for now is transform the streets in to flows of buses. big buses only on the big boulevards. many mini busses many many. so much cheaper than ant tube underground. im sick of going so far down

the fix is give the land back to the humans

what is most cruel now is the city works against us

difficult connecting with one another makes it difficult to survive

and it is getting worse

traditional view of nature will lead humans to extinction. elimination of nature has been our modern project.

all of us have harmed nature and all of us feel loss. before landscape was dangerous. it was nature that would kill us. a natural disaster was what we feared would end our world. that was then. now we are the nuclear generation. we fear apocalypse by man. nature is now our resource - tame and contained - now nature only in the service of us.

BUT nature can exist without us - We can not exist without nature.

THE FIX IS NATURE - Nature as protector of man not mere resource.

continually improve this place . FOR YOU \_)\_\_\_\_\_ dont just reproduce and die THE FIX IS TO PAUSE AND THINK

THE FIX IS FOCUS ON FUTURE FIX
